OUTER SPACES

LANDSCAPE & GARDEN DESIGN

RHS Tatton Park Flower Show 2021

Featuring 'Garden With A View'

Designed by Pip Probert, Outer Spaces

Garden With A View

This garden is a place to sit and contemplate whilst soaking up your surroundings.

Not only does this garden give you plenty to look at within the space, it also allows you to gaze out and appreciate the view beyond. When you are lucky enough to have a 'borrowed' view you should make the most of it!

The colours are soft and subtle, a calming space with lots of planting favourites.

Walking through the garden, there is a lot to see, and as you wander along the gravel path the plants spill over the pebbles and grow naturally without any defined boundaries.

There is a slight coastal feel to the garden, although it is not necessary located near the water. The soft palette entices you in and allows you relax and enjoy!

About Us

With over 16 years' experience in design, build and planting works, over the years Outer Spaces has worked on 38 show gardens at various shows including RHS Chelsea, RHS Tatton Park, RHS Malvern, Gardeners World and Gardening Scotland. All of which have won awards with numerous Gold Medals and even a Best in Show award. We have also been involved in other International Shows such as the Besiktas Garden Festival, Istanbul and the Beijing Horticultural Expo. Previous projects include public gardens and commercial landscape developments, but mostly private garden schemes.

Outer Spaces Landscapes Ltd is directed by both Pip Probert and Wez Salthouse, offering the full design and build service. Priding themselves on a personal approach from the initial design consultation through to completion. Not only do they work on hard and soft landscaping projects but also various events.

Last year saw a new adventure, as Pip Probert featured as one of the Garden Designers on the new BBC program, "Your Garden Made Perfect". Currently filming Series 2, the program will return in the new year.
